Microsoft's European Digital Commitments

We will help build a broad AI and cloud ecosystem across Europe.

We will uphold Europe's digital resilience even when there is geopolitical volatility.

We will continue to protect the privacy of European data.

We will always help protect and defend Europe's cybersecurity.

We will help strengthen Europe's economic competitiveness, including for open source.

A dark, monochromatic photograph of a busy city street. The street is filled with a large crowd of people walking in various directions. Tall, multi-story buildings line both sides of the street, with many windows and architectural details visible. The overall tone is somber and contemplative due to the dark color palette.

Why Microsoft Has Accepted Unions, Unlike Its Rivals

Once again a juggernaut thanks to artificial intelligence, Microsoft has worked to shed its strong-arm image. Is there a catch?

By Noam Scheiber

Published Feb. 25, 2024 Updated Feb. 28, 2024

The December day in 2021 that set off a revolution across the videogame industry appeared to start innocuously enough. Managers at a Wisconsin studio called Raven began meeting one by one with quality assurance testers, who vet video games for bugs, to announce that the company was overhauling their department. Going forward, managers said, the lucky testers would be permanent employees, not temps. They would earn an extra \$1.50 an hour.

It was only later in the morning, a Friday, that the catch became apparent: One-third of the studio's roughly 35 testers were being let go as part of the overhaul. The workers were stunned. Raven

Teachers lead the way in co-creating AI solutions that empower education

"We teamed with Microsoft because we share a fundamental belief—that educators must be at the center of technological integration so AI supplements, rather than substitutes, the human connection that is the cornerstone of teaching and learning."

"AI presents an opportunity to enhance worker experience, giving teachers more time to get back to their true passion—educating young people," said Amy Pannoni, Vice President and Deputy General Counsel, HR at Microsoft. "That focus is what made this symposium unique. The
